## **MRI Training Program for Radiologists**

MRI is a modality which is rapidly expanding and evolving. It gives many challenges for the Radiologists and radiographers. An in-depth understanding of the technology and clinical practice are necessary to exploit the full potential of the MR system. In line with our vision to deliver international level diagnostic services, by creating an institution committed to the highest standards of diagnostic excellence, patient care, scientific knowledge & research. Dr Gulati Imaging Institute offers a course to enhance MRI knowledge for interested radiologists as well as radiographers.

We have prepared the course module with a very gentle learning curve starting with the basics of MRI subsequently building up their knowledge in each anatomy. Participants may also get chance to observe Special Procedures such as MR Mammography, MR Spectroscopy, Tractography, etc. also in this institute.
